

MODULE 3: ADMINISTRATION GUIDELINES COURSE

Overview

<h3>INTRODUCTION</h3> <p>The purpose of this course is to train kindergarten teachers on how to administer the Texas Kindergarten Entry Assessment (TX-KEA).</p>	<h3>PREPARATION</h3> <p>Optional Materials</p> <ul style="list-style-type: none">• Sticky notes• Pens• Paper <p>Required Materials</p> <ul style="list-style-type: none">• Laptops for participants• Internet access• Engage accounts for participants
<h3>TIME</h3> <p>Approximately 30–90 minutes.</p>	<h3>PARTICIPANT HANDOUTS</h3> <ul style="list-style-type: none">• User Guide• 3.1 “Subtest Descriptions”• 3.2 “Do’s & Don’ts of Assessment Administration”• 3.3 “Spelling Student Record Form”

Suggested Process

1. Welcome participants and introduce yourself.
2. Explain housekeeping items, such as break times, restroom locations, etc.
3. Open course on CLI Engage.
4. Use trainer notes to facilitate the course.
 -  Voiceover: Narration automatically plays via course.
 -  Say: Required information to share with participants after the slide appears and the voiceover plays.
 -  Trainer Tip: Optional information to share with participants after the slide appears and the voiceover plays.
 -  Handout: Title of handout to use for the corresponding slide.
5. Refer participants to Handout 3.1 on Slide 05.
6. Refer participants to Handout 3.2 on Slide 17.
7. Refer participants to Handout 3.3 on Slide 55.

MODULE 3 SLIDE 02

	<p>Voiceover:</p>	<p>The Texas Kindergarten Entry Assessment’s online training includes three courses for kindergarten teachers who will administer the screener to students. You are now in Course 2, the Administration Guidelines Course. This course includes administration information for the one-time comprehensive kindergarten entry assessment. The Texas Kindergarten Entry Assessment (TX-KEA) also includes the Literacy Screener which is administered at the beginning of the year. TX-KEA also serves as the BOY (beginning of year) wave 1 assessment for the three-wave kindergarten progress monitoring tool. Information on the MOY (middle of year) wave 2 and EOY (end of year) wave 3 assessments within the three-wave kindergarten progress monitoring tool will also be presented.</p>
	<p>Say:</p>	<p>None.</p>
	<p>Trainer Tip:</p>	<p>None.</p>
	<p>Handout:</p>	<p>None.</p>

MODULE 3 SLIDE 03

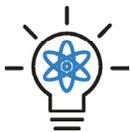

Voiceover:

In this course, you will learn how to administer TX-KEA to your students. First, we will discuss what you need to do and what materials you need to gather to administer the test. Next, we will explain how to administer and score the different item types on TX-KEA. Lastly, we explore each subtest and how it is best administered to students.

Say:

“Take a look at the wall. There are three pieces of chart paper, each with a different question. The first one says ‘What do you know about TX-KEA?’. The second one says ‘What do you want to know about TX-KEA?’ And, the third one says ‘What did you learn about TX-KEA?’ You all are going to answer the first two questions which will help us give you the information you need and hopefully by the end of this training, we will be able to fill the third question with lots of responses.” “Take the next couple minutes to write down what you already know about TX-KEA and what you would like to know or questions you might have about TX-KEA. Write at least one response for each question then stick your response on the chart paper under the corresponding question. Use the sticky notes in front of you.” After participants have had a chance to post their sticky notes... “Let’s take a look at what you all already know about TX-KEA.” (read sticky notes summarizing and generalizing similar responses) Move on to the next question... “Now, let’s see what you all would like to know about TX-KEA.” (read sticky notes summarizing and generalizing similar responses) “As we progress through today’s training, we’ll also stop from time to time to make sure your questions are getting answered.”

Trainer Tip:

Write the questions on chart paper and post them up before the training starts. Place sticky notes and pens/pencils on tables before the training starts. Re-visit “What do you want to know about TX-KEA?” as needed throughout the training to resolve questions that have been answered. Example: K-W-L Chart

What We <u>K</u> now	What We <u>W</u> ant to Know	What We <u>L</u> earned

▶

Voiceover:

The Texas Kindergarten Entry Assessment (TX KEA) is a comprehensive assessment that can be used to evaluate many learning domains critical for academic success at kindergarten entry and throughout the kindergarten year. The Language and Literacy domain consists of vocabulary, letter names and spelling which also serve as the TX-KEA Literacy Screener which is only administered at the beginning of the year. The language and literacy domain also includes listening comprehension, letter sounds, blending and decoding. Note that decoding is only assessed later in the school year. STEM consists of mathematics, science and engineering. The Motors Skills domain includes fine and visual motor skills. The Social Emotional domain assesses students’ social emotional competence and emotion management. While the Executive Functioning domain assesses students’ inhibition, working memory, and attention.

TX-KEA is a comprehensive assessment; however, you have the flexibility to administer whichever subtests that you and your administrators are most interested. You also have the flexibility to administer these subtests in any order.

MODULE 3 SLIDE 07

The screenshot shows a presentation slide with a blue header containing the 'TX-KEA TRAINING' logo and the title 'TX-KEA Administration Guidelines'. The main content area is white and titled 'Testing Materials'. It lists four items: 'Computer device', 'Windows operating systems acceptable', 'Touchscreen computers may be used', and 'Headphones'. To the right of the text is an image of a laptop. At the bottom of the slide, there is a navigation bar with a left arrow, a progress indicator, and a right arrow.

Voiceover:

The TX- KEA assessment should be administered using a laptop or desktop computer. Audio does not perform well on tablet devices, such as iPads and Android tablets, and are not recommended for administration. Use of laptop and desktop computers is strongly recommended for best functionality.

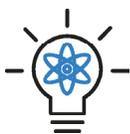

If available, touchscreen computers may be used for TX-KEA administration to allow students to interact directly with the assessment. If a touchscreen computer is not available, students can provide responses by touching or pointing at the monitor. The teacher will then record the responses by using a mouse to click on the images that the student points to.

Headphones will be needed, as many subtests require students to wear headphones to clearly hear the audio prompts.

Say:

None.

Trainer Tip:

You may pause here to encourage participants to determine if they will have correct equipment to administer the test and then develop a plan to obtain the equipment if they do not. Ask them to jot down the people they will contact to inquire about this.

TX-KEA TRAINING
TX-KEA Administration Guidelines

Initial Assessment

- Before testing students, go to the **Assessment Practice Area** and run each subtest.
- This will allow the program to download files.
- We **strongly** recommend that you run each subtest in the assessment practice area before you administer them to students.

The screenshot shows a dashboard with a navigation menu at the top. The 'Assessment Practice Area' is highlighted with a red arrow. Below the navigation menu are three main sections: 'Assessment Practice Area', 'CIRCLE Progress Monitoring Pro-2', and 'Texas Kindergarten Entry Assessment'. The 'Assessment Practice Area' section includes the text: 'The Assessment Practice Area allows educators to view and practice student assessments.'

◀
▶

	Voiceover:	<p>Before testing students, run the assessment in the assessment practice area. This will allow the program to download files to administer subtests, but it also offers teachers an opportunity to view all the items before administering with students. This process affects the administration time, including delaying the start of each subtest and items displayed in the subtests. Because of this we strongly recommend that you run each subtest in the assessment practice area before you administer them to students. This will ensure the assessment loads and runs at normal speeds.</p>

TX-KEA Administration Guidelines

Invalidating the Assessment

- Only invalidate an assessment if a scoring error was made by the assessor.
- Do not reassess the student for several days to avoid "practice" effect.

◀

12
▶

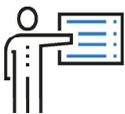

Voiceover:

An assessment can be invalidated if scoring errors were made by the assessor. For example, if the Teacher accidentally assessed the wrong child, accidentally assessed a child in the wrong language, accidentally assessed the wrong measure or accidentally assessed a child outside the guidance from their IEP, the assessment would need to be invalidated.

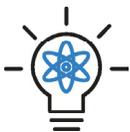

You may also invalidate in extreme situations where a student is distressed, becomes ill, or due to interference such as a fire drill or emergency distraction prevents you from proceeding. From the “Results” screen, click the “Invalidate” button. The measure will not be scored. We recommend waiting several days to reassess to avoid the “practice” effect.

After the score is saved on the results screen and the teacher clicks done, the teachers are no longer able to invalidate assessment scores. On CLI Engage, administrators and specialists have the ability to invalidate student assessment scores. For assistance, submit a help ticket.

Say:

None.

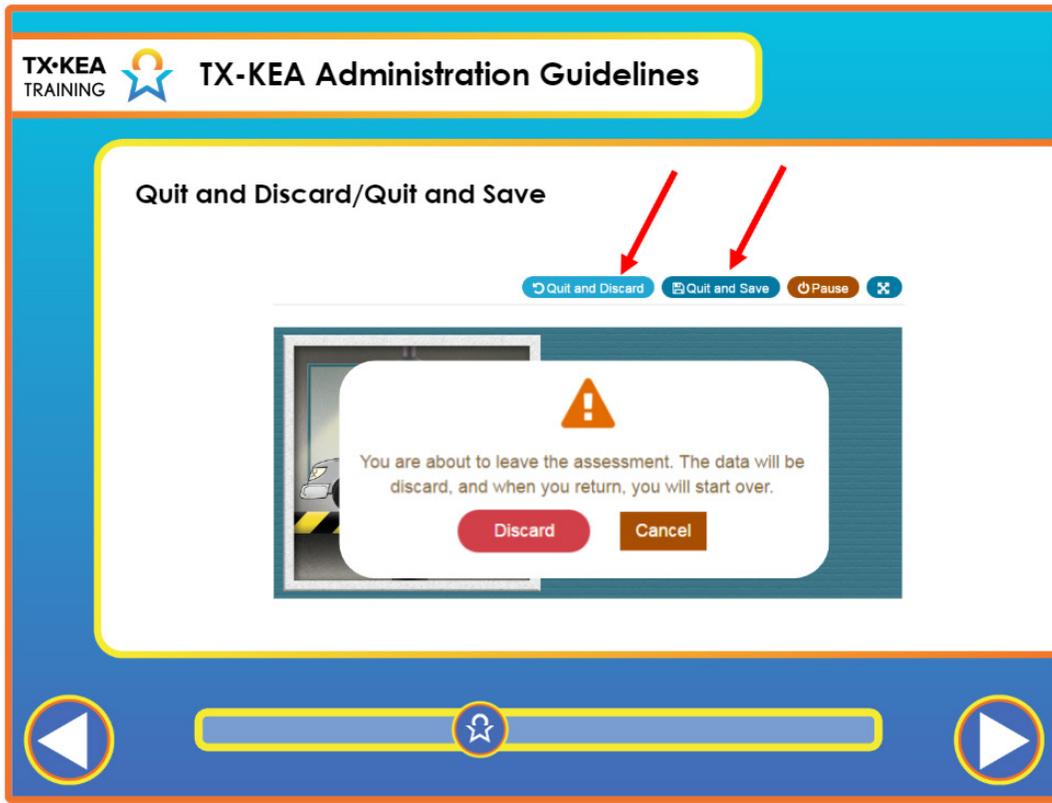

Trainer Tip:

None.

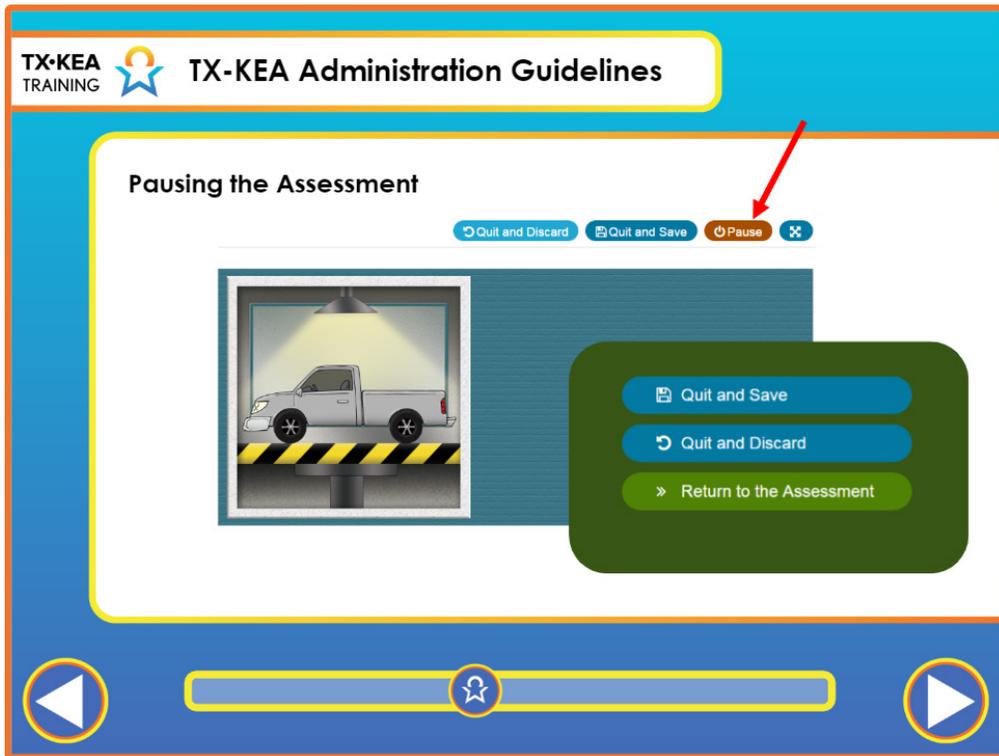

Handout:

MODULE 3 SLIDE 16

TX-KEA TRAINING TX-KEA Administration Guidelines

General Testing Guidelines

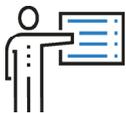

- Note that **students will vary** in terms of their familiarity and comfort with tests.
- **Be** sufficiently **familiar** with the Engage platform.
- Make sure all **equipment is working properly**.
- Have a **plan for managing your class** while you work with one student.
- You do not need to complete TX-KEA in one sitting, but you should **complete a subtest** in one sitting.
- You can **administer** the tests in **any order**.
- **Sit** with **each student** to make sure they are following directions.

Voiceover:

Before you begin to administer TX-KEA, we recommend reviewing the following guidelines. First, note that each student’s level of comfort with testing will vary. Some students will be familiar with assessments administered across Texas, such as the CIRCLE Progress Monitoring System. However, some students in Kindergarten have little to no experience with assessments. Second, decrease administration errors and improve children’s testing experience by becoming familiar with the CLI Engage platform. This will allow you to effortlessly move through the assessment activities and better manage the student’s behavior. Third, check your equipment, such as touchscreens and headphones, before you begin testing a student. Make sure the equipment is working properly and that the volume of the headphones is sufficiently high relative to the background noise in the room. Fourth, have a plan for managing your class while you work with one student at a time on TX-KEA. Ask yourself: Have I completed the training and understand all of the procedures? Will I have support while I work to complete the assessment with students? If I do not have assistance, how will I keep the other students occupied while I assess each student?

Remember, you can administer the tests in any order. If you administer multiple tests, the tests will proceed left to right as they appear on the launch page. Make sure you sit with each student to ensure they are paying attention to the screen and listening for computer prompts. Following these guidelines will help you have a positive testing experience.

Say:

“Let’s read through the “Do’s & Don’ts of TX-KEA Assessment Administration” handout. This is a general list and you will hear about some do’s and don’ts that are specific to a particular subtest that you will want to jot down in the space provided. Throughout this training, I will ask to give me a thumbs up(assessment do) or thumbs down (assessment don’t) as we practice giving the assessments to one another. Keep your copy of the Do’s and Don’ts handy if you need to check yourself. ”

Trainer Tip:

Have participants take out their handout and read the Dos and Don’ts together.

Handout:

[Dos & Don’ts of Assessment Administration](#)

Accessing the Assessment

- **Log-in** to CLI Engage.
- From the Dashboard, select **Texas Kindergarten Entry Assessment**.
- Select **"TX-KEA."**
- Navigate to your **classroom**.
- Select **the subtest(s)** you would like to administer.
- Select the correct assessment wave.
- Click the **multi-launch button** to the right of the student's name.
- Make sure the student has **headphones** on before you begin the test.

◀

☆
▶

	<p>Voiceover:</p>	<p>To administer the test, log-in to TX KEA through CLI Engage. On the Dashboard view you'll see the Screening , progress Monitoring and observation red banner. Select Texas Kindergarten Entry Assessment and you will be automatically navigated to your campus classroom. Locate your classroom and select it. If your district or charter school is using the one-time kindergarten entry assessment, you will assess in Wave 1. For the kindergarten progress monitoring tool, wave 1 is for the beginning of year, wave 2, for middle of year, and wave 3, for end of year. Then, select the specific subtest or subtests you would like to administer to students. Click the multi-launch button to the right of the student's name. The student should have headphones on before you begin the test.</p>
	<p>Say:</p>	<p>None.</p>
	<p>Trainer Tip:</p>	<p>None.</p>
	<p>Handout:</p>	<p>None.</p>

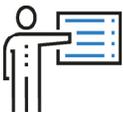

Voiceover:

TX-KEA has four item types: student-selected responses, teacher-recorded responses, teacher-reported behavior checklists, and student-written responses. Some subtests include two of these item types. For student-selected responses, students will listen to an audio prompt and select from among multiple choices. Students can select their responses by touching the screen, using a developmentally appropriate pointing device, or simply pointing, in which case the teacher should click on their choice. The test will automatically advance to the next item.

TX-KEA's second item type is teacher-recorded responses. These items require the student to listen to an audio prompt and then provide a verbal response. The teacher then records the student's response by selecting incorrect or correct. The test will then advance to the next item.

The third type is teacher reported behavior checklists which teachers will complete on Engage. These behavioral checklists ask teachers to rate how frequently they observe certain behaviors at school.

The fourth item type, student-written response, is specific to the spelling subtest. Teachers will prompt students to spell words and students will write responses on a sheet of paper. The teacher will score spelling on Engage.

TX-KEA Administration Guidelines

Administering Student-Selected Response Items

How should the teacher and student situate themselves?

- You can sit side-by-side.

How do you administer?

- Student must wear headphones.
- Have student listen to the audio prompt and make a selection.
- You do not prompt student.

◀

▶

▶

	Voiceover:	Before you begin the test, sit beside the student. After you select the subtest you would like to administer, place headphones on the student. Instruct the student to listen to the audio prompt and then make a selection by touching the screen. You do not prompt the student when administering student-selected response items.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

TX-KEA Administration Guidelines

How Students Select Items

Students can select response by:

- Touching the screen (with touchscreen technology)
- Using a mouse
- Pointing to screen (if student does not know how to operate mouse, teacher uses mouse to select student's response)

	Voiceover:	For student-selected response items, students can select responses by touching the screen, if the screen is compatible. Students can also use the mouse to make a selection. If the student does not know how to use a mouse, then he or she can point to the answer and you can use the mouse to make the selection.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

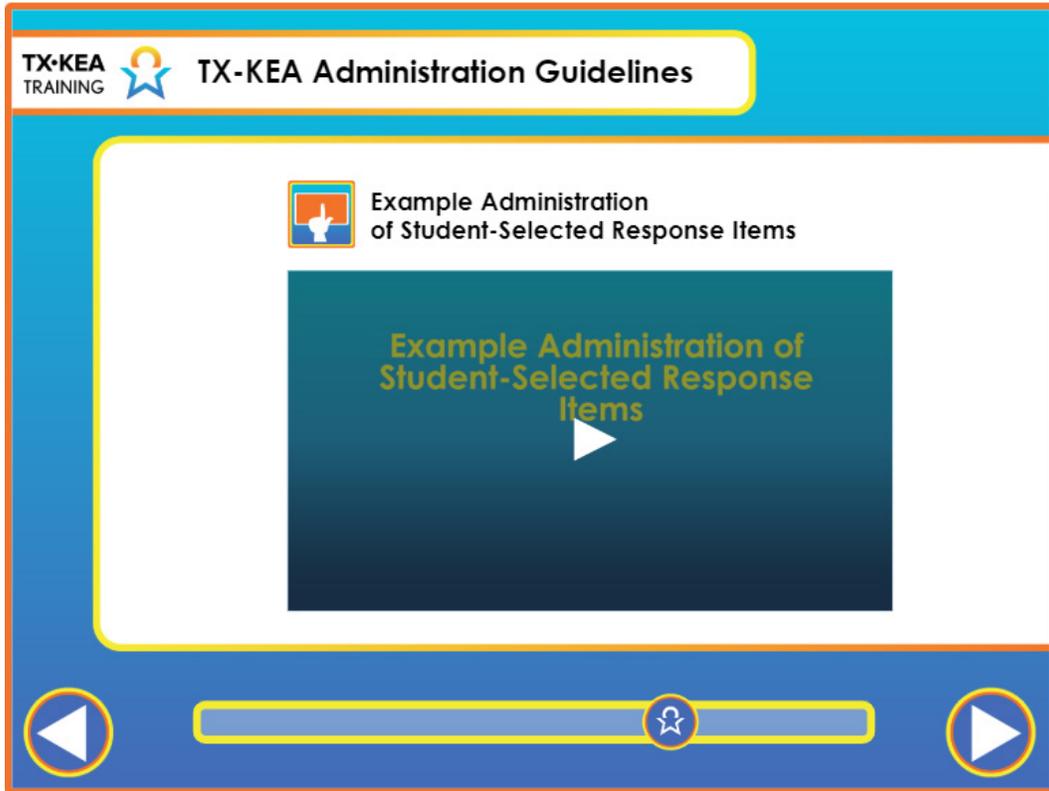

TX-KEA Administration Guidelines

Scoring Student-Selected Response Items

- Teacher **does not score** items involving student-selected responses.
- The **test scores** the item **automatically**.
- If the student does not make a selection, the **test** eventually **advances** to the next item.
- No response** by the student is scored as **incorrect**.

▶

	Voiceover:	You do not need to score items that involve student-selected responses. The computer will score this item type automatically and then advance to the next item. If the student does not make a selection, the test will time out and score the item as incorrect and then advance to the next item.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

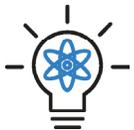

Voiceover: None.

Say:

Before the video begins, say “The pop-up in the upper right corner shows what the child sees on the screen.”

After the video, say “What did you notice about the student and the teacher during this assessment?” (The teacher was sitting beside the child but was still able to see the screen. The teacher allowed the child to independently use the mouse to complete the assessment. The child was seated in front of the screen with headphones on.)

Trainer Tip:

None.

Handout: None.

TX-KEA
TRAINING
TX-KEA Administration Guidelines

Administering Teacher-Recorded Response Items

How should the teacher and student situate themselves?

- You can **sit side-by-side**.

How do you administer?

- Student **wears headphones** for most subtests.
- Prompts will either be **audio prompts** given by the test or **teacher prompts** read from the screen.
- Have student **listen** to prompt **and verbalize** his or her response.

◀

☆

▶

	Voiceover:	Similar to student-selected response items, sit beside the student during teacher-recorded response items. Select the subtest you would like to administer. Some subtests have computer-administered audio prompts that require students to wear headphones. Other subtests require the teacher to read prompts printed on the screen. When prompts are printed on the screen for the teacher to say, students do not need to wear headphones. Regardless of how the prompts are provided, students respond verbally to the questions and then the teacher records the response on the screen.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

The screenshot shows a presentation slide with a blue header containing the TX-KEA TRAINING logo and the title 'TX-KEA Administration Guidelines'. A calendar icon is in the top right. The main content area features a video player with a play button and a progress bar. The video player's title is 'Example Administration of Teacher-Recorded Response Items'. The video frame itself shows the same title on a dark blue background with a play button in the center.

	Voiceover:	None.
	Say:	“What did you notice about the student and the teacher during this assessment?” (The student was sitting in front of the screen and verbalizing her answer. The teacher was sitting to the side but able to navigate the screen with the mouse to enter the student’s response.)
	Trainer Tip:	None.
	Handout:	None.

TX-KEA Administration Guidelines

Scoring Teacher-Recorded Response Items

- **Teacher scores** teacher-recorded response items.
- Scoring is **based on criteria** on the screen.
- **Prompts** will **vary** depending on the subtest.
- If the student does not make a selection, the **teacher scores** the item as incorrect.

◀

100%

★

▶

	Voiceover:	<p>You will score the student’s verbal response by either typing in the response, selecting “incorrect” or “correct”, or selecting the response from a list of acceptable options. You will know the student’s answer is incorrect or correct by reviewing the acceptable answers on the page. Occasionally, you may need to follow-up a child’s response with a query. Query procedures are unique to each subtest. Generally, if the student’s answer is not listed, then that response should be scored as incorrect.</p>
	Say:	None.

MODULE 3 SLIDE 27

TX-KEA TRAINING
TX-KEA Administration Guidelines

Teacher-Reported Behavior Checklist

How do you administer?

- Complete electronically on CLI Engage.
- Reflect on student's typical interactions.
- Answer all questions.
- Only complete checklists for five students or less in one sitting.

How is it scored?

- Program scores each checklist.

◀

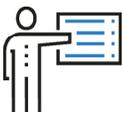

⏸
▶

Voiceover:

You will complete checklist items for each student on CLI Engage. We recommend taking a moment before beginning the checklist to recall a few typical interactions with the student: What is this student usually like on a day-to-day basis? In general, how does she interact with you? How does she interact with classroom peers? The checklists are geared toward understanding how the student behaves most of the time - they are not meant to describe how the student behaves on his or her best or worst days. We found that taking a few moments to recall interactions with the student makes it easier to complete the checklist. We ask that teachers try to answer all questions as this results in the most accurate scores. We also recommend completing no more than five student checklists in one sitting. This ensures high levels of accuracy when describing each individual student's behaviors.

You will not have to score the checklists, as the computer will sum responses across items that were answered. Some items will be "reversed scored" based on the wording of the question to ensure that higher scores represent higher levels of skills. We will provide more information about rating students' behavior when we discuss individual checklists.

	Voiceover:	As stated earlier in this course, TX-KEA is a comprehensive assessment. For the remainder of this course, we will look more closely at the domains and subtests listed here. As a reminder, you have the flexibility to administer whichever subtests that you and your administrators are most interested in.
	Say:	“As we move into learning how to assess students, we will reference your Administration Waves Handout as not all assessments will be available at each wave. Much research has gone into determining the appropriateness of when and what components of each domain are introduced. It is a great reference tool to keep handy once you begin assessments and throughout the year.”
	Trainer Tip:	As the training proceeds, refer to this handout if questions arise about language and waves of administration.
	Handout:	Administration Waves Handout

Language

Vocabulary Subtest

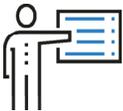

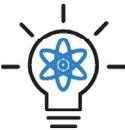

- **Vocabulary** is a **foundational oral language** skill that **supports learning** in all content domains.
- **Knowing** a student's vocabulary abilities **helps educators adjust** their own vocabulary usage during instruction to levels that are most beneficial for individual students.
- Administration time = approximately 4 minutes
- Timed task = no
- Item type = **teacher-recorded responses**
- Available at all 3 waves

	Voiceover:	<p>The Vocabulary subtest addresses the body of words students know. Vocabulary is a foundational oral language skill that supports learning in all content domains. With more information about your student's vocabulary abilities, you are able to adjust your own vocabulary during instruction to levels that are most beneficial for individual students.</p> <p>This subtest is untimed. It takes approximately one minute to complete. The items on this task are teacher-recorded responses and this subtest is available at all three waves.</p>
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Language

How does TX-KEA assess vocabulary?

- Teacher **uses prompts** like:
 - "What is this?" or "¿Qué es esto?"
 - "What are these?" or "¿Qué son estos?"
- The **pictures appear** on screen and illustrate objects, categories, and actions.
- **Teacher scores** student's verbal **response** by reviewing the scoring sheet for acceptable answers.

!!!

	Voiceover:	<p>For this subtest, students are first shown a picture on the screen. Next, they are asked by the teacher to label the picture using prompts like “What is this?”, “What are these?”, and “What is she doing?” The pictures presented to students illustrate objects, categories, and actions. Different items will be included for each wave of the vocabulary subtest. You will score the student’s verbal responses on the next screen by selecting any acceptable responses spoken by the student. The vocabulary scoring guidelines which include acceptable prompts and responses for each item can be found under the Training and Support tab of CLI Engage under How to Guides. They can also be found on the introductory page of the vocabulary assessment once it is launched. You will learn more about allowable prompts after we watch this clip of the Vocabulary subtest.</p>

34

MODULE 3 SLIDE 34

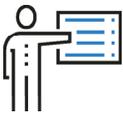

Voiceover:

Rarely, but occasionally, the student may provide a response requiring you to ask a follow-up question. The follow up question or prompt should only be used one time for the vocabulary item in question.

1. For example, if a student provides an answer in a language other than the one being tested, then the initial response should not be scored. Instead, the teacher will ask the student, "What's the English word?" or "Cual es la palabra en español?" If after querying the student still responds in the wrong language, then score the item as incorrect.
2. Another time when it is necessary to query is when a student labels the wrong part of an image. In this situation, direct the student's attention to the correct part of the image by pointing directly to it. If necessary, direct the student's attention to the whole image by pointing and using a circular motion around the image and saying, "What is **THIS**?" or "Que es **esto**?"
3. If the student's response is too general, such as "animal" for "dog", then ask the student, "What kind?" or "Que tipo?"
4. If the student's response is too specific, for example, golden retriever for dog, then say to the student, "Tell me another word." or "Dime otra palabra."

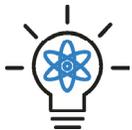

These prompts should not be used for other reasons. For example, if the student provides a wrong answer or an answer that is nearly correct but not listed as a correct response, do not instruct the student to tell you another word.

Note: If the student's response contains the target word, you can score his/her response as correct. For example, the item shows a picture of a vacuum and the correct response is "vacuum". The student says, "vacuum cleaner" for this item. This response is scored as correct because the student's response contains the target word "vacuum".

Say:

"Let's practice administering the Vocabulary subtest. Login to Engage and go to the Assessment Practice Area. Find the TX-KEA test and select a student that has not been administered the Vocabulary subtest. Choose a partner and practice administering this sample subtest to each other. Locate the Vocabulary Scoring Guidelines for acceptable student responses. You will need to have this handout with you as you administer the Vocabulary subtest to students to ensure scoring accuracy."

Trainer Tip:

Tell teachers that links to the Scoring Guidelines documents for Vocabulary can be found on the opening page of the assessment as well as under How to Guides on Engage.

Literacy

How does TX-KEA measure letter names?

English Letter Name Identification

- Teacher-recorded response
- Student is shown one letter at a time and asked to provide name of letter.

Spanish Letter Name Recognition

- Student-selected response
- Student is shown four letters on the screen and is asked to point to the letter named by the computer.

◀

ABC
XYZ

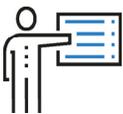

▶

Voiceover:

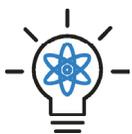

To assess a student’s knowledge of English letter names, the student is shown one letter at a time and asked to provide the name of the letter they see. Teachers score students’ responses as either correct or incorrect. This 11-item test takes less than one minute to administer.

To assess a student’s knowledge of Spanish letter names, the student is shown four letters on the screen and is asked to point to one of the four letters that they hear named by the computer. This is a student-selected response task and the test automatically scores the student’s response as either correct or incorrect. This 11-item test takes one and a half minutes to administer. In the video, you will see an example of the letter names subtest being administered in English.

Allowable Prompts for Letter Names Subtest

Allowable Prompts in English

There may be rare occasions when a student provides a response that requires you to follow-up.

- If student responds with the **letter's sound** instead of its name:
"That's the sound this letter makes. Tell me the name of this letter."
- If student responds with a **word that starts with the letter**:
"Tell me the name of this letter."
- If student responds in the **wrong language**:
"What's the English letter?"

Allowable Prompts in Spanish

- If the student does not respond by pointing to a letter within 5 seconds, you may prompt by saying:
"Señala la letra."

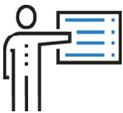

Voiceover:

Although scoring student responses on this test is usually straightforward, there are a few situations that will require you to ask a follow-up statement. For example, if a student responds with the letter's sound instead of its name, then you will respond by saying, "That's the **sound** this letter makes. Tell me the **name** of this letter."

Also, if a student responds with an English word that starts with the letter, then the examiner should say, "Tell me the name of this letter."

Finally, if a student responds with the Spanish name for the letter, then the examiner should say, "Tell me the **English** name for this letter." If the student does not reply with the correct answer after the appropriate follow-up statement is provided, then the item is scored as incorrect. In other words, follow-up statements are never repeated within a given test item.

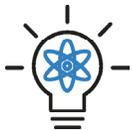

In the Spanish letter naming task, if the student does not respond by pointing to a letter within 5 seconds, you may prompt by saying
– Señala la letra.

Say:

"Give me a thumbs up or a thumbs down if I should give a score of incorrect if my student says the word Zebra for the letter Z."

"This is a thumbs down. I would not score this as incorrect. I would further prompt my student by asking her to tell me the name of the letter."

Trainer Tip:

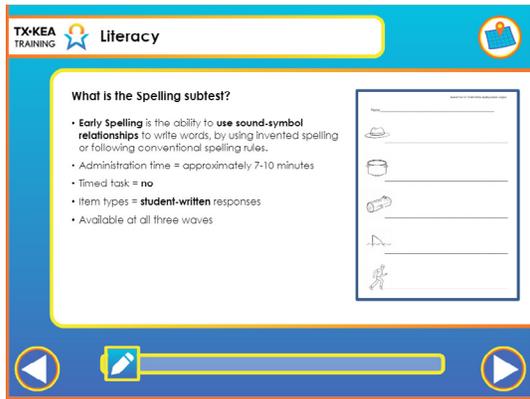

Check-in with participants to clarify when and how to use prompts. Refer to Do's and Don'ts of Assessment Handout

Handout:

None.

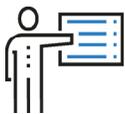

MODULE 3 SLIDE 39

Voiceover:

The TX-KEA Written Spelling subtest addresses early writing and spelling. TX-KEA assesses spelling because it is highly related to later literacy achievement as it uses sound-symbol relationships to write words. Early writing and spelling are two broad skills addressed with the early writing subtest. Often, the first word students attempt to write is their own names. You will see that the students are asked to write their names at the top of their form. This is an important early literacy skill necessary for students to be successful in kindergarten, but will not be included in the scoring section of the spelling subtest. Attempting to spell words requires students to apply multiple literacy skills simultaneously, such as alphabet knowledge and phonological awareness. Different items are included at each assessment wave.

The Spelling subtest is student written and takes approximately 7-10 minutes to administer individually, but can also be administered in small groups which reduces the testing time per student. This subtest is available at all three waves. The teacher scores the spelling components of the test on CLI Engage after administering the test. The Spelling student forms, teacher script, scoring guidelines with a sample of acceptable letter approximations is available on CLI Engage under the Training and Support Section, How to Guides. The links are also available on the introductory page of the Spelling assessment.

Say:

None.

Trainer Tip:

None.

Handout:

None.

MODULE 3 SLIDE 40

TX-KEA TRAINING Literacy

How does TX-KEA measure and score spelling?

- The student is shown a **demonstration video** in which a teacher spells a sample word.
- Then the student is asked to **spell common words** that are **pictured** on the student form.
- Scoring is **not based on handwriting**.
- Credit is given for **recognizable letters** (or reversals) in **the correct position**.

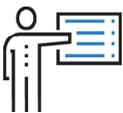

Voiceover:

For the Spelling task, the student is first shown a demonstration video. This is an important step so that students understand that the goal is to write all the sounds they hear in a word. Next, the student is asked to spell five words that are pictured on a sheet of paper. Each of these words are commonly used words that follow regular sound/spelling patterns using common consonants and vowels at Wave 1. The words become increasingly challenging at Waves 2 and 3.

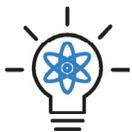

The scoring requires students to use conventional spelling rules, rather than developmental spelling approaches. TX-KEA assesses application of conventional spelling rules because this yielded a more reliable score than developmental spelling methods in our validation study.

The TX-KEA Written Spelling subtest does not measure handwriting. It is not expected that students have conventional handwriting at the beginning of the kindergarten year. Thus, written letters only need to be recognizable to be scored as correct. Letter approximations and common reversals can be scored as correct. The guiding principle is to give the student credit for a letter if it is a recognizable attempt. You should refer to examples of acceptable, recognizable letters in the TX-KEA Scoring Guidelines, available under the Training and Support section of CLI Engage under How to Guides.

Say:

None.

Trainer Tip:

None.

Handout:

None.

TX-KEA TRAINING **Literacy**

Why does TX-KEA require correct spelling?

- The purpose of TX-KEA Written Spelling is to **screen** students.
- Credit is given only for **correct letters**, not substitutions with similar sounds.
- Credit is given only for letters in the **correct position**, not letters in the wrong order.

Voiceover:

The purpose of TX-KEA spelling is to serve as a screening measure. The purpose is not to identify students' stage of spelling because many curricula have specific guidelines for placing students at different stages of spelling into the appropriate level of word study.

To efficiently screen students and identify those who need additional support or monitoring, a correct/incorrect framework was the most valid and reliable approach. We examined developmental scoring in our validation work, but it did not improve accuracy of identifying students in need of support and it is more complex to score. Therefore, credit is given only for correct letters - not substituted letters that sound similar. The letters must be written in the correct order to receive credit. Therefore, if a student writes a correct letter but in the wrong position it does not receive credit. This strict scoring for correct sounds and positions is appropriate as a screening tool, but does not reflect developmental expectations for students entering kindergarten.

Say:

None.

Trainer Tip:

None.

Handout:

None.

Literacy

How do TX-KEA scores relate to stages of writing?

At the **beginning** of kindergarten:

- there is considerable **variability** in students' writing skills.
- it is **not** expected that students will spell all words correctly.

At the **end** of kindergarten, it is common for students to continue making spelling substitutions or errors.

1-Scribbles or Pictures	2-Symbols	3-Random Letters
<small>Drawing pictures or scribbles. Not yet using symbols or numerals.</small> 	<small>Representing symbols or numerals that are not yet an letter approximation.</small> 	<small>Represent letters or letter approximations in an apparently random order or a string of letters.</small>
4-Beginning Sounds	5-Beginning and Ending Sounds	6-Beginning, Middle and Ending Sounds
<small>Represent beginning consonant with the correct letter or acceptable substitution. Relevant sounds can be represented in any order.</small> 	<small>Represent beginning and ending consonants with the correct letter or acceptable substitution. Relevant sounds can be represented in any order.</small> 	<small>Represent beginning consonant, medial vowel and ending consonant sounds with the correct letter or acceptable substitution. Relevant sounds can be represented in mirror image order.</small>

Voiceover:

As stated, TX-KEA’s strict correct/incorrect scoring is not meant to relate to beginning of year expectations. This diagram shows how many children’s writing skills develop. There is considerable variability in students’ writing skills at the beginning of kindergarten. Some entering kindergarten students will be in early writing stages using symbols or random letters. Other students are able to represent beginning sounds or multiple sounds in words. Even by the end of kindergarten, children continue to make errors or substitutions for vowels or other sounds. These typical stages of early writing are important to keep in mind because this stringent scoring approach is only for screening purposes, not developmental expectations. Let’s view a demonstration video for this task. You will notice that the teacher has prepared all of her materials in advance and is showing the students a short instructional video before the administration of this task.

Say:

“Let’s look at your handout to review the TX-KEA acceptable approximations of letters that you will want to reference when scoring your spelling assessments. This can be found on the CLI Engage website, Training and Support Tab, How to Guides, TX-KEA Scoring Guidelines.”

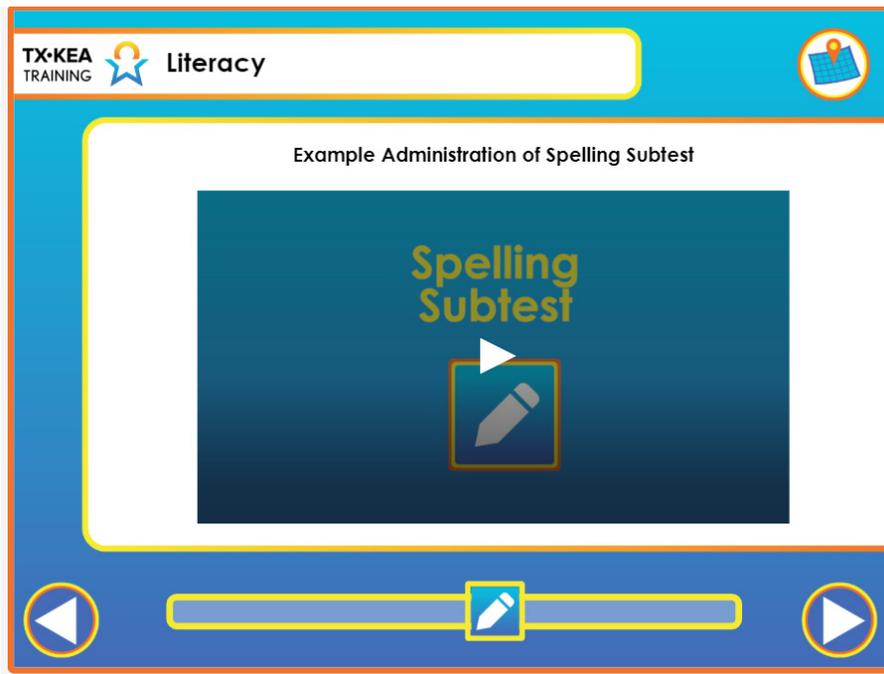

Trainer Tip:

None.

Handout:

[Letter Approximations for the Spelling Subtest](#)

Voiceover:

If you are unable to show the teacher demonstration video to the students, then first demonstrate the spelling test by modeling writing a word and discuss how the student writes all the sounds they hear. Use the exact bolded script for this demonstration. You will need to print the demonstration sheet to model the sample demonstration item on page 1 of the spelling model card. It is strongly recommended that you show the video in lieu of teacher demonstration.

Say:

“Now that you’ve seen the video of exactly how the teacher demonstrates the administration of the Spelling subtest, let’s take a moment to review the Spelling model card and demonstration item. This is found on CLI Engage site, Training and Support Tab, How to Guides, TX-KEA Scoring Guidelines.”

“Now, turn to your partner and one of you can be the examiner and the other the student. Practice demonstrating how you can use this exact script if for some reason your technology does not allow you to play the video. When you are finished, switch roles and practice again.”

Trainer Tip:

Wander the room and take note of teachers who are following the exact script when in the “Examiner” role and share with the group how important this is .

Handout:

[Spelling Model Card](#)

TX-KEA TRAINING Literacy

Allowable Prompts for Spelling

What prompts can I give during the spelling task?

- If the student is holding the pencil, but *has stopped writing*, you can say: "Are you done with that word? ¿Terminaste con esa palabra?"
- If a student does not understand or says "I don't know," say: "That's OK. Just write what you can. Está bien. Sólo escribe lo que puedas."
- Allow student "scribble" for approximately 10-15 seconds, then say: "OK that's all the time we have for that word so put your pencil down. Bueno, eso es todo el tiempo que tenemos para esa palabra así que ponga su lápiz hacia abajo."
- If a student is *writing outside the line* on the first item, point and say: "Try to write on this line for this word. Trate de escribir en esta línea para esta palabra."

Voiceover:

You can provide additional prompts to students during the Early Spelling task.

For instance, if a student seems to be done spelling the word or has paused for several seconds, but does not put the pencil down, then prompt: **Are you done with that word?** Allow the student to respond. If he says no, then allow approximately 10-15 seconds before you stop him and say: **Let's go on to the next word.**

If a student does not understand or says "I don't know," you can say: **That's okay. Just write what you can.**

If a student is scribbling only, allow her to scribble for approximately 10-15 seconds and then stop her and say: **Okay, that's all the time we have for that word so put your pencil down.**

If a student is writing outside the line on the first item, point and say: **Try to write on this line for this word.**

Literacy

TX-KEA Spelling Student Record Form

Materials:

- Video model and computer to show students how to write all the sounds in a sample word.
- TX-KEA Spelling Student Form
- Multiple sharpened pencils and erasers

You may choose to administer the spelling test in a small group to reduce total testing time.

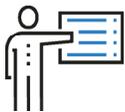

Refer to the TX-KEA Scoring Guidelines, available in the “Training and Support” section under How-to-Guides, for the Student Form, Teacher Script, and Scoring Guidelines.

Voiceover:

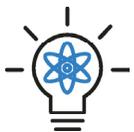

You will need special materials to administer the Written Spelling task. You will need the video and a computer to show students how to write all the sounds in a sample word. This video provides a model to students on how to spell and write down words on the form. You will find the link to this video on the introductory page when you launch the Spelling subtest. You will also need the Student Form for TX-KEA Spelling Subtest and multiple sharpened pencils and erasers. You can administer the spelling test individually or in a small-group to reduce total testing time. You may consider using privacy folders when administering in small groups.

Refer to the TX-KEA Scoring Guidelines, available in the “Training and Support” section of CLI Engage under How to Guides, for the Student Form, Teacher Script, and Scoring Guidelines. The links are also available within the assessment itself.

Say:

Handout:

None.

MODULE 3 SLIDE 46

Voiceover:

Once the students have completed their spelling test, the teacher will score the results of the student forms on CLI Engage. This is a sample of two of the items to be scored in the Wave 1 English Spelling subtest. Students earn one point for each correct, recognizable letter that is written in the correct position within a spelling word. This is a test of orthographic knowledge, so childlike handwriting is acceptable. If letters are not represented in the correct order you only award points for letters in the appropriate positions.

For example, if a child writes the letters H, A, A and T for the word “HAT” you only award two points for the correct first and second letter.

If a child writes a mirror image with the letters T, A and H for the word “HAT” you would award only one point for the correct second letter. If a letter is substituted, you cannot award a point for that letter.

For example, if a child writes the letters H, E and T for the word “HAT” you only award two points for the correct first and last letter.

If a letter is omitted, you can only give a point for any letters that are in the correct position.

For example, if a child only writes the letters H and T for the word “HAT” you only award one point for the H in the correct first letter.

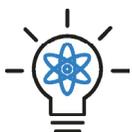

If a letter is inserted at the end of the word, no points are taken away for this extra letter.

For example, if a child writes the letters H, A, T and then adds an additional T for the word “HAT” you award all three points for the correct first, second and third letter.

Say:

“Now that we have heard about how the 1st item on this slide was scored, turn to your neighbor and practice with the second item. One of you can be the teacher and the other the student. Be sure to give the directions just as you would when administering the subtest in your classroom. When administering and scoring, please use your Spelling form and letter approximations key. The Spelling forms we have today apply to Wave 1. You can access Wave 2 and 3 forms on CLI Engage along with the other forms we are using today.

Trainer Tip:

Pause here to recap what was stated in the example to check for understanding regarding how each item was scored for the word “hat”. Have participants practice with the word “pot” seen on the slide.

Language

Listening Comprehension Subtest

- **Listening comprehension** is a foundational language skill that **supports learning** in all content domains.
- **Knowing** a student's **language comprehension** helps **educators adjust** their own language during instruction to levels that are most beneficial for individual students.
- Administration time = approximately 5 minutes.
- timed task = no
- Item type = **student-selected responses**
- Available at Wave 1 and Wave 3

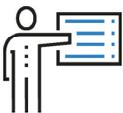

Voiceover:

Listening comprehension refers to a collection of foundational oral language skills that support learning in all content domains. In fact, receptive language ability is one of the strongest predictors of literacy achievement. The TX-KEA Listening Comprehension subtest measures children’s ability to understand a number of grammatical structures and their ability to follow multi step directions.

Knowing your student’s receptive language abilities will equip you to adjust the complexity of your own language during instruction. This will help your students understand your instruction, and it will help you scaffold their language development.

The Listening Comprehension subtest is untimed and takes about five minutes to administer. This subtest requires student selected responses and is available at both wave 1 and wave 3.

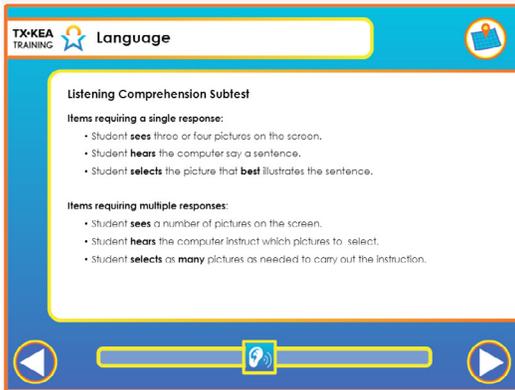

Say:

None.

Trainer Tip:

None.

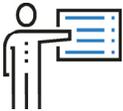

Voiceover:

The listening comprehension subtest has two types of test items: single-select items and multiple-select items. For the single-select items, students see three or four pictures on the screen. When the pictures first appear, they are grayed out and cannot be selected. They change to color and become selectable after all the words comprising a sentence are presented by the computer over headphones. At this point, children should select the one picture that best illustrates the sentence they heard. It is important that teachers attend to children during this subtest to make sure they do not try to select pictures before the pictures become selectable. The computer will not register the selection of grayed images, which could result in an item being scored as incorrect if a child selected the right picture while it was gray. The computer will automatically advance to the next item after it registers selection of one picture.

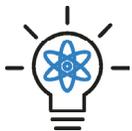

Multiple-select items work in much the same manner. The main difference is that students may see anywhere from three to eight pictures, and they may need to select from two to four of those pictures to receive full credit for an item. Making sure children do not start selecting pictures until they turn to color becomes even more important on multiple-select items. The computer will not advance to the next item until it registers selection of the right number of pictures.

Let's watch a video clip of the administration of the Listening Comprehension subtest.

TX-KEA TRAINING Literacy

How Does TX-KEA Assess Blending Sounds?

Step 1. Student sees **three or four pictures appear** on the screen one at a time. The pictures are **labeled by the computer** as they appear.

Step 2. Computer presents a series of sounds.

Step 3. Student selects the picture that illustrates the blended word.

Images: Helicopter, Motorcycle, Airplane, Train

Progress bar: a-b

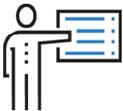

Voiceover:

Students see three or four pictures appear on the screen, one at a time. The pictures initially appear grayed and are not selectable. Each picture is labeled by the computer as it appears.

Students then hear the computer present a series of sounds with brief moments of silence between the sounds. The pictures turn to color and become selectable after all of the sounds are presented.

Students then point to the picture that illustrates the word formed when the sounds are blended together. Teachers should pay close attention to the students to make sure they do not try to respond until after the pictures turn color and are selectable. The subtest is scored automatically by the computer and automatically advances after the student makes a selection. Let's take a look at the blending sounds subtest being administered.

Say:

None.

Trainer Tip:

None.

Handout:

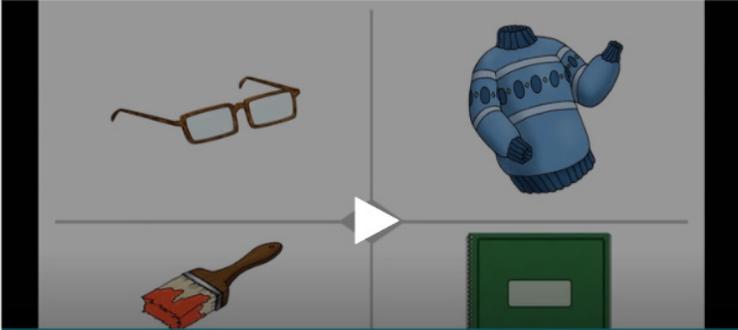

None.

Literacy

Example Administration of Blending Sounds Subtest

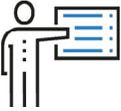

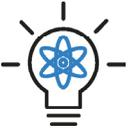

Images appear on the screen and are labeled by the computer. Computer presents a series of sounds. Child selects the image that illustrates the blended word.

STEM

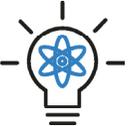

Mathematics Subtest

- The **TX-KEA Mathematics** subtest focuses on math skills related to **numbers and counting, operations and patterning, geometry and spatial reasoning, and math in the real world.**
- Formal and informal mathematics learning helps **develop students' abilities to problem solve and use math** in academic and everyday settings.
- Administration time = approximately 4–5 minutes
- Timed task = no
- Item types = **student-selected** and **teacher-recorded** responses
- Available at all three waves

	Voiceover:	The TX-KEA Mathematics subtests focus on math skills related to numbers and counting, operations and patterning, geometry and spatial reasoning, and math in the real world. Formal and informal mathematics learning helps develop students' abilities to problem solve and use math in academic and everyday settings. It takes approximately four to five minutes to complete the mathematics subtests. These subtests are untimed and include both student-selected and teacher-recorded response items. Math, parts 1 and 2 are available at all three waves.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

	Voiceover:	In the rote counting task, the student does not need to view the screen. The teacher asks the student to play a counting game. The teacher can use additional prompts to help the student get started. The teacher enters the highest number successfully counted in sequence in the space provided. You'll see in the following video that the Math subtest in Part 1 is teacher recorded and student selected and begins with this rote counting item.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

	Voiceover:	None.
	Say:	“As you saw, the Math subtest begins with a rote counting item. The student does not need headphones for this item. Instead, text is provided on the screen that the teacher will read to the student to prompt him/her to begin counting. After this item, the student will wear headphones for the remainder of the Math subtest.”
	Trainer Tip:	None
	Handout:	None.

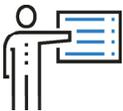

Voiceover:

If students do not count aloud on the counting items, we recommend that you encourage the student to count aloud. You may also suggest that the student point to objects on the screen while counting.

Counting items include special scoring instructions. Students count aloud the objects pictured on the screen, and then state the cardinal value for the set of objects. If a student counts the items without stating the cardinal value, prompt the student by asking, “How many are there?”

For example, you can say, “Count aloud so I can hear you. You can use your finger to count.” When students count aloud, it helps you determine when they are finished counting so you can ask, “how many are there?”

Say:

None.

Trainer Tip:

None.

Handout:

None.

TX-KEA TRAINING STEM

Special Scoring Instructions – Cardinality

Prompt: "How many bananas are there altogether?"

Correct responses

The student's final response is the cardinal value scored. For example:

- The student incorrectly counts the items and correctly says the cardinal value
- The student correctly counts the items and correctly says the cardinal value

Voiceover:

You must determine if the answer provided is correct or incorrect and record the student's response. Let's consider various scenarios to help determine when to score a student response correct versus incorrect.

Now imagine that the student incorrectly counts the bananas by saying, "1, 2, 5, 6, 3 through 26." You would still check for cardinality by asking, "How many are there?" If the student says "25" this response is correct since the student provided the correct cardinal value.

Look at the set of 25 bananas on the screen. The computer will prompt the student to count the bananas and say how many there are. Let's say the student counts aloud, "1, 2, 3 through 25". You would check for cardinality by asking the student, "How many are there?" If the student says "25," you record this as a correct response.

Say:

None.

Trainer Tip:

None.

Handout:

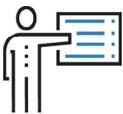

None.

Voiceover:

Let’s now consider scenarios where you would record student responses as incorrect. If the student says “I don’t know” or states any number other than the correct cardinal value, record the response as incorrect.

Imagine that the student counts aloud, “1, 2, 3, 4, 5 through 25” You check for cardinality by asking, “How many are there?” If the student says “26” or any other number than “25,” record this as an incorrect response. The student’s final answer to the cardinal value is always the response that you will score. The student’s correct counting of the objects is not taken into consideration for scoring.

Say:

“Let’s practice administering the Mathematics subtest. Login to Engage and go to the Assessment Practice Area. Find the TX-KEA test and select a student that has not been administered the Mathematics subtest. Choose a partner and practice administering this sample subtest to each other.”

Trainer Tip:

None.

STEM

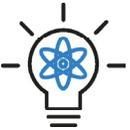

Science & Engineering Subtest

- The TX-KEA Science and Engineering subtest **focuses on** students' **content knowledge** and **understanding** of scientific processes.
- Assesses students' understanding of **physical, life, earth, and space sciences** as well as the **engineering applications** of science.
- Administration time = approximately 5-7 minutes
- Timed task = no
- Item type = **student-selected** responses
- Available at all three waves

	<p>Voiceover:</p>	<p>The TX-KEA Science and Engineering subtest focuses on student’s content knowledge and understanding of scientific processes. The Science subtest assesses students’ understanding of physical, life, earth, and space sciences as well as the engineering applications of science. It takes approximately 5 minutes for each student to complete this subtest. This is an untimed subtest and is available at all 3 waves. All science and engineering items are student-selected items for which they point to the screen to make a selection. The items are multiple choice and some require more than one response to be selected.</p>
	<p>Say:</p>	<p>None.</p>
	<p>Trainer Tip:</p>	<p>None.</p>
	<p>Handout:</p>	<p>None.</p>

How does TX-KEA assess science & engineering?

Items requiring a single response:

- Student **sees** three or four pictures on the screen.
- Student **hears** the computer provide an instruction.
- Student **selects** the picture that provides the **best answer**.

Items requiring multiple responses:

- Student **sees** a number of pictures on the screen.
- Student **hears** the computer instruct which pictures to select.
- Student **selects** as **many pictures** as needed to carry out the instruction.

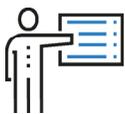

Voiceover:

The Science and Engineering subtest has two types of test items: single-select items and multiple-select items. For the single-select items, students see pictures on the screen. The computer provides auditory instructions about which picture to select. Then, the students select the one picture that best carries out the instructions they heard. The computer will automatically advance to the next item after it registers the selection of one picture.

Multiple-select items work in much the same manner. The main difference is that students need to select more than one picture to receive full credit for an item. The computer will not advance to the next item until it registers the selection of the right number of pictures.

Let's watch an example of the administration of the Science and engineering subtest.

Academic Motor Skills

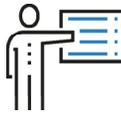

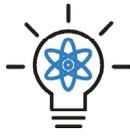

Academic Motor Skills Subtest

- The **TX-KEA** Academic Motor Skills subtest includes items that reliably and efficiently **evaluate** many of the **motor skills** required for successful completion of school activities.
- **Exploration of the environment** forms the basis of many skills necessary for success in kindergarten.
- Administration time = approximately 3 minutes
- Timed task = no
- Item type = **teacher-reported behavior checklist**
- Available at **Wave 1**

	Voiceover:	<p>The TX-KEA Academic Motor subtest includes items that reliably and efficiently evaluate many of the motor skills required for successful completion of school activities. Throughout the preschool years, children learn to effectively coordinate the use of their hands, eyes, and the rest of their body as they explore different environments. Motor skills are especially important for early academic tasks. The Academic Motor Skills subtest is available at wave one only and is untimed. It will take you approximately three minutes to complete the checklist for one student. You will complete the checklist electronically on CLI Engage.</p>
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Academic Motor Skills

How does TX-KEA measure motor skills?

The subtest is designed as a checklist and addresses **observable behaviors**.

Motor skills are recorded as:

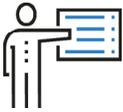

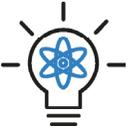

- typical for age
- delayed
- not observed

	Voiceover:	Students are assessed using a checklist that is completed by the teacher who reflects on his or her observations of the student’s motor behavior. You will record whether the student’s motor behavior is typical for his or her age, delayed, or not observed. “Typical for age” means that the student’s motor skills are developmentally appropriate, whereas “delayed” means the student’s motor skills are behind the development of her peers. You can score “not observed” if you have not yet observed the student display a given behavior.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Academic Motor Skills

Scoring Instructions for Motor Skills

- **Fine** and **visual motor skills** can be assessed in the **classroom**.

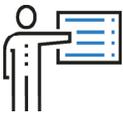

Voiceover:

Visual and fine motor skills are best observed in the classroom doing normal activities, such as drawing, cutting, and lacing. During recess and physical education times, gross motor skills are best assessed through observation.

Say:

“Consider a student you’ve taught or a child you know who has struggled using a pair of scissors or holding a writing utensil. Now, Let’s take a look at the handout that explains, in great detail, the rating scale for Academic Motor Skills. Based on the guidance offered on the handout, would the child you have in mind be delayed or typical for his or her age?”

Trainer Tip:

Have one participant share with the group about rating a students’ use of scissors and another share how he or she rated a students’ use of a writing utensil. Have them give their rationale based on the handout.”

Handout:

[Rating Scale Examples for Academic Motor Skills](#)

Social Emotional

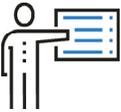

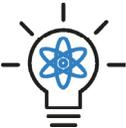

Social and Emotional Competence

- The **TX-KEA Social and Emotional Competence** subtest focuses on students' **social and emotional skills** within a classroom setting.
- Administration time = approximately 2-3 minutes
- Timed task = **no**
- Item type = **teacher-reported behavior** checklist
- Available at all three waves

	Voiceover:	The Social and Emotional Competence subtest focuses on students' social and emotional skills within a classroom setting. The subtest evaluates students' pro-social skills, approaches to learning, and emotion understanding. It will take 2 to 3 minutes to complete checklists for each student in your classroom and is available at all three waves. You will complete the checklist electronically on CLI Engage.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Social Emotional

Instructions for Rating Behaviors

Rate each student's social and emotional competence based on the **typical** interactions with the student.

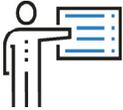

- Consider **behavior displayed** when the student is alone and when he or she is with adults and peers.

	<p>Voiceover:</p>	<p>You are asked to report on these skills for each student based on typical interactions. When rating the frequency of students' behaviors, reflect on the behavior they display when alone and when interacting with peers and teachers. Typical interactions are ones that occur during normal, everyday experiences. This means that you do not want to heavily weigh a student's behavior during a fire drill, the first day of school, or with a substitute teacher, for example, as behavior displayed in such contexts may not represent a child's overall adjustment.</p>
	<p>Say:</p>	<p>None.</p>
	<p>Trainer Tip:</p>	<p>None.</p>
	<p>Handout:</p>	<p>None.</p>

Social Emotional

How does TX-KEA measure Social and Emotional Competence?

The subtest is designed as a **checklist** and addresses **observable behaviors**.

Skills are recorded as occurring:

- rarely
- sometimes
- consistently

Voiceover:

The Social and Emotional Competence subtest is a questionnaire that you complete for each student in the classroom. We recommend that you complete the checklist after students have adjusted to kindergarten and after you have sufficiently observed students interacting with each other and with teachers. Students' social-emotional competence will be scored automatically based on how frequently you report observing certain behaviors at school. You will record whether each particular behavior occurs rarely, sometimes, or consistently.

“Rarely” is used to indicate that you may have observed the student display the behavior a few times.

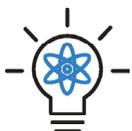

“Sometimes” means you have observed the behavior occur occasionally since the beginning of the school year.

A score of “Consistently” means that the student consistently displays the behavior.

Say:

None.

Trainer Tip:

None.

Social Emotional

Social and Emotional Competence Scoring Example

<p>* 8. Feels and demonstrates pride for own accomplishments? ¿Siente y demuestra orgullo por sus propios logros?</p>	<p><input type="radio"/> 1 - Rarely/Rara vez</p> <p><input type="radio"/> 2 - Sometimes/Ocasionalmente</p> <p><input type="radio"/> 3 - Consistently/Consistentemente</p>
<p>* 9. Verbally expresses his or her feelings when he or she has been wronged (without tattling)? ¿Expresa verbalmente sus sentimientos cuando ha sido perjudicado/a (sin acusar)?</p>	<p><input type="radio"/> 1 - Rarely/Rara vez</p> <p><input type="radio"/> 2 - Sometimes/Ocasionalmente</p> <p><input type="radio"/> 3 - Consistently/Consistentemente</p>
<p>* 10. Recognizes and names basic emotions (happy, sad, mad, scared) in photographs or books? ¿Reconoce y nombra las emociones básicas (felicidad, tristeza, ira, miedo) en fotografías o libros?</p>	<p><input type="radio"/> 1 - Rarely/Rara vez</p> <p><input type="radio"/> 2 - Sometimes/Ocasionalmente</p> <p><input type="radio"/> 3 - Consistently/Consistentemente</p>
<p>* 11. Shows concern for and/or tries to comfort upset/sad peers? ¿Muestra preocupación y/o intenta consolar a sus compañeros?</p>	<p><input type="radio"/> 1 - Rarely/Rara vez</p> <p><input type="radio"/> 2 - Sometimes/Ocasionalmente</p> <p><input type="radio"/> 3 - Consistently/Consistentemente</p>

Voiceover:

This is an example of how you will score social and emotional competence. You'll see that information is provided in parenthesis to help clarify the question or to provide an example.

Say:

“Let’s look at your handout and read the Social and Emotional example about a child named George that is on the TX-KEA Scoring Guidelines Page of CLI Engage.”

“Without looking at the answers, turn to your neighbor and rate the behaviors you see on this slide. Discuss your rationale for rating the behaviors as you did.”

Trainer Tip:

Reconvene as a group and have 1 person per table share their ratings with the whole group. Review the answers in the handout to check for understanding while referencing the rating scales.

Executive Functioning

Working Memory Subtest

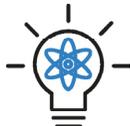

- Working memory assesses students' **ability to remember** 1 – 3 pieces of information at one time.
- Administration time = approximately 2 – 3 minutes
- Timed task = no
- Item type = **student-selected** responses
- Available at Wave 1

◀

★

▶

	Voiceover:	The Working Memory subtest assesses students' ability to hold in memory 1 to 3 pieces of information at a time in an increasingly complex setting. This subtest is untimed and takes approximately 2 to 3 minutes to administer. The items on this task require student-selected responses and are available at wave 1. It is recommended that the student wear headphones in this subtest.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Executive Functioning

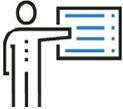

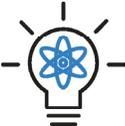

How does TX-KEA assess working memory?

- Students are shown images of vehicles in garages.
- They are prompted to **recall where vehicles are parked** in a garage.
- The number of vehicles and the number of parking spaces **increases** as the students progress.

◀

▶

	Voiceover:	In this subtest, students are shown images of vehicles in garages. Then, they are prompted to recall where the vehicles are parked in a garage. The number of vehicles and the number of parking spaces increases as the student progresses. In the following video, you will see an example of the working memory subtest being administered.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Executive Functioning

Example Administration of Working Memory Subtest

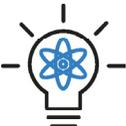

Working Memory Subtest

▶

	Voiceover:	None.
	Say:	“Let’s practice administering the Working Memory subtest. Login to Engage and go to the Assessment Practice Area. Find the TX-KEA test and select a student that has not been administered the Working Memory subtest. Choose a partner and practice administering this sample subtest to each other.”
	Trainer Tip:	None.
	Handout:	None.

Executive Functioning

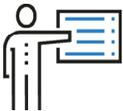

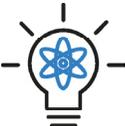

Inhibition Subtest

- Inhibition assesses students' **ability to inhibit, or withhold, a response**
- Administration time = approximately 2-3 minutes
- Timed task = yes
- Item type = **student-selected** responses
- Available at Wave 1

	Voiceover:	Inhibition assesses students' ability to inhibit, or withhold, a response. It takes approximately two to three minutes to administer this task. It is timed, consists of student-selected response items and is available at Wave 1. As a reminder, students should wear headphones.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Executive Functioning

How does TX-KEA assess inhibition?

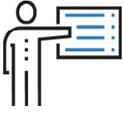

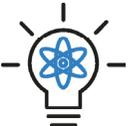

- Students are asked to **respond accurately** to specific stimulus (i.e., butterfly), and **withhold**, or inhibit, a response to a different stimulus (i.e., bee).
- This task involves students catching butterflies in a butterfly net, but **NOT** catching bees for a certain time limit.
- Students are **warned** that **butterflies** are fast.
- Scores reflect the students' ability to respond accurately while **inhibiting a response**.

	Voiceover:	<p>Students are asked to respond accurately to a specific stimulus (i.e., butterfly), and withhold, or inhibit, a response to a different stimulus (i.e., bee). This task involves students catching butterflies in a butterfly net but NOT catching bees for a certain time limit. They are warned that the butterflies are fast and that the students must be fast too. Scores reflect the student's ability to respond accurately while inhibiting a response.</p>
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Executive Functioning

Special Scoring Instructions - Inhibition

After administering the Inhibition task, you will notice on the Results Screen that a score of “1” indicates when a student touched the bee on the screen. For example:

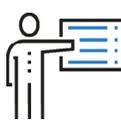

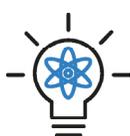

- Student A touches the butterfly five times and the bee two times. His total score would be two.
- Student B touches all of the butterflies and never touch a bee. Her score would be zero. This means she followed the instructions and inhibited her response of touching the bee.

	Voiceover:	<p>After administering the Inhibition task, you will notice on the “Results” screen that a score of “1” indicates when a student touched the bee on the screen. For example:</p> <p>Student A touches the butterfly five times and the bee two times. His total score would be two.</p> <p>Student B touches all of the butterflies and never touches a bee. Her score would be zero. This means she followed the instructions and inhibited any response of touching the bee.</p>
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

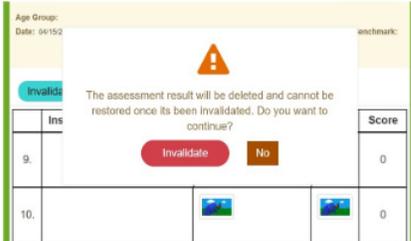

Executive Functioning

Special Scoring Instructions - Inhibition

If a student **never touches** the screen, then select “Invalidate the Assessment.”

- **Invalidate** the assessment because the students’ **non-response would equal** a score of **zero**.
- You may encourage the student to try the Inhibition task at another time.

Voiceover:

If a student does not participate and the allotted time concludes, then select “Invalidate the Assessment” on the Results Screen.

The assessment should be invalidated because the student’s non-response would equal a score of zero which is the same score as a student who touches the butterfly consistently and never touches the bee.

Since the student will be instructed **not to touch the bees**. If the student touches the bees, the high score will reflect “**high impulsivity**.” It is important to ensure the student is attentive and engaged throughout the administration of this task.

This is the only measure in TX-KEA where a **low score is desired**.

You may choose to try the Inhibition task at another time if the student does not respond initially. Let’s take a look at a video clip of the Inhibition subtest being administered.

Say:

None.

Executive Functioning

	Trainer Tip:	None.
	Handout:	None.

Executive Functioning

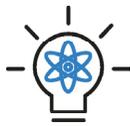

Attention Subtest

- Attention assesses students' ability to **focus** their attention, stay **on task**, and quickly and accurately focus on **relevant features** of the image.
- Administration time = approximately 2 minutes
- Timed task = yes
- Item type = **student-selected** responses
- Available at Wave 1

	Voiceover:	Attention assesses students' ability to focus their attention, stay on task, and quickly and accurately focus on relevant features of the image. It takes two minutes to administer this timed task. The items are student-selected responses and available at wave 1. As a reminder, students should wear headphones.
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Executive Functioning

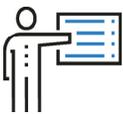

How does TX-KEA assess attention?

- Students are shown a **target image** of a flower at the top of the screen and 5 flowers along the bottom of the screen.
- Students **identify one** flower from the bottom of the screen that matches the target image at the top of the screen.
- Students have **2 minutes** to make as many correct matches as possible.

	Voiceover:	<p>Students are shown a target image of a flower at the top of the screen and 5 flowers along the bottom of the screen. Then, students identify one flower from the bottom of the screen that matches the target image at the top of the screen. Students have 2 minutes to make as many correct matches as possible. Let's take a look at a video of the attention subtest being administered. You will notice that the student is given two example items as well as one practice item before the timed task begins.</p>
	Say:	None.
	Trainer Tip:	None.
	Handout:	None.

Voiceover: None.

Say: “Let’s practice administering the Attention subtest. Login to Engage and go to the Assessment Practice Area. Find the TX-KEA test and select a student that has not been administered the Attention subtest. Choose a partner and practice administering this sample subtest to each other.”

Trainer Tip: None.

Handout: None.
